## INSPECTION GUIDELINES

The following are the point-by-point guidelines regarding items looked at during the inspection process for the above stated inspections.

### 1. Sanitation & Care

**a. Storage of Food Supplies:** Food supplies shall be stored in a location and container, which adequately protects it against infestation or contamination by vermin & Perishable food refrigerated.

**b. Animal Food, Waste and Debris Removal:** Provision shall be made to remove wastes daily. Disposal shall be made so as to minimize vermin infestation, odors and disease hazards. Perishable food refrigerated.

**c. Walls and Floors made of material, which can be easily sanitized:** Non-absorbent material, which can be readily sanitized.

**d. Proper Drainage:** Constructed to eliminate excess water from indoor housing. Drains constructed and maintained in proper repair to avoid foul odor or backup from them.

**e. Number of times fed daily:** Shall be properly fed according to the species size and requirement..

**f. Food/Water dishes durable and clean:** Disposable may be used if discarded after each feeding. Dishes shall minimize contamination from excreta, be free of mould, caking or food deterioration.

**g. Food wholesome and sufficient:** Free from contamination, wholesome and palatable and sufficient quantity and nutritional value to meet normal daily requirements for condition and size of animal.

**h. Water accessible:** Potable water available at all times. Receptacle clean.

**i. Animals clean:**

## General Condition of Animals

### 2. Shelter

**a. Sufficient shade:** When sunlight is likely to cause overheating or discomfort, sufficient shade shall be provided to protect animals from direct rays to the sun.

**b. Shelter from inclement weather:** Sufficient shelter to allow animals to remain dry during rain or snow.

**c. In good repair, structurally sound:** In adequate repair to keep the animals from injury, to contain them, to keep predators out, and to allow animals to remain clean and dry.

**d. Adequate size for animals:** Provides adequate space to allow each animal to turn around freely, easily stand, sit or lay in a normal position and exercise.

**e. Shelter overcrowded:** The number of animals shall not exceed a number that would allow proper ventilation and sanitation.

**f. Shelter properly cleaned:** Excreta removed as often as needed to prevent contamination of animals kept there and to deduce disease hazard and odors.

**g. Ventilation adequate:** Fresh air provided by windows, doors, vents or air-conditioning and ventilated to reduce drafts, odors and moisture condensation.

**h. Perimeter containment:** Outdoor facilities shall be fenced around the perimeter so that animals cannot escape or other animals gain entrance.

3. **Is the facility a \*nuisance or health hazard to neighborhood: Check Animal Control complaint files, Code Enforcement and neighbors. \*(Ord. 6.20.070)**

4. **Is pest control (flies, rodents) adequate: Insects, ectoparasites and mammalian parasites well limited or nonexistent?**

5. **Disease control:**
